Charis Privacy Policy

Version 2026-08-02

Charis collects only the wallet addresses and operational records required to run charitable and real-property campaigns, issue receipts, coordinate licensed title closings, and support required U.S. tax reporting (Form 1099-DIV and Form 1042-S). Wallet message signatures accepting Terms are stored with the accepted version and timestamp.

Midnight zero-knowledge compliance keeps member compliance checks private: wallet-level OFAC/KYT clearances and optional tax-tier disclosures are proved locally in your browser so personal tax forms never appear on public blockchains. Members who choose Zero-TIN Privacy Mode (Tier 2) store zero personal identifying information on Charis.

Campaign organizers, nonprofits, and DAO-elected Ministerial Stewards complete KYB/KYC identity verification via Zyphe (and IRS 501(c)(3) verification where applicable) solely for due diligence, closing escrow, and legal compliance. We never sell user or donor information.

Third-party infrastructure providers (such as Cardano indexers, Zyphe, Propy, and authorized IRS electronic tax transmitters) process data strictly as needed to deliver platform services. Transactions broadcast to public blockchains are permanently visible on those ledgers.

For privacy inquiries or data requests, email support@charis.global. Related platform terms appear in the Charis Terms of Service.
